is to be trusted, and we have reason to believe that if English journalists were weeded by an examination in which ctymological accuracy was the mine qua non, the profession would lose some very competent members. One occasional contributor to this journal, a man whose education has been of a singularly perfect kind, and who is a true scholar in his way, never sends in a contribution without hulf-a-dozen etymological errors, and there are double-firsts who would rather trust thomselves in Greek than Buglish without a pocket dictionary. It is curious the commercial schools which confess to tenel, and do teach spelling; do not turn out apellers half as accurate as the kind, and that hundreds of persons learn to spell, or rather begin to spell well habitually, only in manhand that is when the attention has at last been aroused. Whether the extrems case, that of a man of high culture, who absolutely could not learn to spell ever happened, we are uncertain but almost all men who have to read much manuscript believe it, and a kindred inability. that of recollecting dates and figures, certainly does exist. But an inability to spell, arising from a certain folders of interest in words, is a distinct characteristic of English minds, and

VELOCIPEDE SOHOOLS The nightly scenes at Burnham's and Witty's schools in Brooklyn constitute quite an entertainment. The expert riders of Brooklyn are multiplying rapidly, and at both the above velocipede arenas the displays of skill and daring me numerous. The funny side of the picture is also exhibited nightly in the form of the collisions, falls, narraw escapes and the wabbling movements of the tyros in the art. The attendance of spectators each night is such as to crowd both halls, the gallery at Burpham's being specially devoted to the use of ladies and those of the other sex accompanying them, while at Witty's half the ladies have the front seats. Mr. Burnham has introduced velocipede riding as a feature of the exercises of his lady olasses, and Mrs. Burnham already rides with a degree of modest case and skill surprising to those who imagine that ladies cannot ride a two-wheeled velocipeds without objectionable exposes. The exercise is especially adapted for ladies, and it is simply as an exercise that Mr. Burnham has introduced it. None but ladies are admitted to the ball during the ladies' class exercise, and those who have been seen Mrs. Burnham ride are in a fever to learn the art themselves. The ordinary dress used by ladies in these calisthenic exercises is just suited for use in riding the bicycles, not half as much expose of the nether limbs being made as in the ordinary walking attire. Never before in the history of manufactures in this country bus there arisen such a demand for an article as now exists in relation to velocipedes. They are manufactured now at the rate of 1,000 a week and that is about the tenth part of the number of orders received for thom. One contract was made this week for the manufacture of 5,000

The Tribune Association has insured the life f Mr. Greeley for thebandsome sum of \$100,000 It is reported that the premiums on this liberal insurance, amounting to \$7,000 a year, are to be paid to advertising. This shows what a keen eye to business the New Yorkers possess. An old gentleman, travelling on a Western milroud, had two ladies, sisters, as companions. The younger, an invalid, soon asleep, and the uld gentleman expressed his regret to see so charming a young lady in ill health. "Ah, yes, indeed, " sighed the elder sister, " a disease of the heart." "Dear me," was the sympathetic response, "at

Amour bese curious insects, a portion of the cummunety secrete honey in the abdominal cavity until they swell up to the shape of small grapes. These individuals form the storehouse of the community, and during the winter they are disputched in succession to furnish food for the other members of the bolony. They also bear much relation to the workers among the honey bees, and, like them, do not possess the power of feeundity. It is a puzzling question among the inquirers in the "origin of species" from a scientific standpoint, to comprchend how the sterllity of the working auts and beca were ever introduced through the medium of modified descent - the Darwinian theory-or how it is kept up from generation to generation by those individuals who have no posterity to inherit their peoulimity of structure. How, by modified descent, is the honey making espacity of the honey ant "transmitted, when those who possess it are year after your systemationly destroyed? These facts seem to point with almost irresistable logic to the theory of special creation."

SPANISH AFFAIRS. - The Times correspondent at Madrid writes :- "We live here under a perfect reign of terror. I do not mean terror of the evil the Government may inflict: I mean terror of the evil against which the Government is perpetually warning us. It is only a few days since, at a private meeting of a majority of the Cortes, Marshal Serrano strongly urged upon the assembled deputies the necessity for the most thorough union, by reminding them that Reaction was earnestly at work, and disposed of the most powerful elements. And it was only yesterday that upon the motion for a general amuesty being brought forward for discussion in full Congress, the Home Minister, Senor Sagoeta, expressed his regret that such a measure 1.340 should be for the present out of the question, as it had came to the positive knowledge of the Government that the Curlists were armed and organised, ready to take the field." W. LOBSCHEID, publish d at the Daily

AOR scope and practical service this Work

which the Ohinese have of Inte yours been com-

polled to coin to express the numerous objects

in machinery, photography, telegraphy, and in science generally, which the rapid advance of

foreign relations has imposed upon them, are here given in extense. Each and every word is

fully illustrated and explained, forming exer-

cises for students of a most instructive nature.

the best principle hitherto attained. The typo-graphy displays the success of an attempt to

make the Chinese and English type correspond in the size of body, thereby effecting a vist

economy of space, achieving a clearness not

previously attained, and dispensing with those

vast margins and vacant spaces which have heretofore characterized Chinese publications.

utilitarian purposes so complete, that a re

ference to its pages enables a person who understands English to communicate effectively

with natives who understand nothing but Chi

nese. In this respect the work will be found indispensable to all Enimpeans residing in

Ohina, and to the natives themselves, it ex

plains subjects fully, with which very few in

doed of thom are perfectly acquainted. To parties resident in England and interested in

China it cannot but be invaluable occasionally.
